Attn: Larry Trimble, Senior Geologist

Re: Notice of Intention to Conduct Exploration. McIntyre Project, SE $\frac{1}{4}$ Section 2, T31S,
R25E, SLB&M, Metalliferous Minerals Lease ML 49377.

Dear Mr. Trimble:

The School and Institutional Trust Land Administration is in receipt of the above referenced Notice of Intent to Conduct Exploration. It is noted that Section 2 is geologically mapped with exposures of the Salt Wash and Summerville Members of the Morrison Formation. The Morrison Formation is known to yield significant vertebrate fossils. As the proposed exploration will create surface disturbance through road building and drill site preparation the Trust Lands Administration will require a paleontological survey, conducted by a qualified paleontologists, of the proposed roads and drill sites.

If you have any questions please contact me at (801) 538-513 or at wstokes@utah.gov

Sincerely

William M. Stokes
Minerals Resource Specialist
